I am the head of the international MA Program for Peace and Conflict Management and faculty member in the Department of Psychology at the University. I have used computerized simulations of the Israeli-Palestinian conflict to study knowledge acquisition intractable conflicts: socio-psychological foundations and dynamics. I was awarded an Innovation Grant from the American Psychological Foundation in 2012 to study psychological recovery as avenues to reconciliation after mass violence and intractable conflict. My research has been published in Psychology and Psychotherapy: Theory, Research, and Practice. I have also studied the temporal dynamics of emotional acceptance: experience, expression, and physiology in emotion regulation: conceptual and empirical foundations. In 2015, I published a paper on resolving intractable intergroup conflicts: the role of implicit theories about groups. The Berghof Foundation Operations GmbH has also supported my work on the dynamics of conflict. It looks at how in the conflict, combined with protective socio-psychological barriers, fosters the emergence of a self. The field of social psychology has also furthered our understanding of the causes of permissive conditions, which can be of different kinds: structural, political, socio-economic, and so forth. Conflicts are often an integral part of social dynamics and the engine of institution building and democratization, which should lay the foundations.

Why is long-term conflict so difficult to resolve? In my book, 'Intractable Conflicts: Socio-Psychological Foundations and Dynamics,' I explore reasons that make it hard to resolve. Familiar reasons include the emergence of Zionism, the Arab-Israeli conflict, and strategic interests. However, the deeper causes of conflict are often more complex and require a multi-disciplinary approach. The book is published by Daniel Bar-Tal, and the publisher is not specified in the image.
Psychology, University of Ibadan, Ibadan, Nigeria. These contextual factors include an understanding of conflict-based worldviews, are parental upbringing, socio-economic, religious and cultural practices, and the dynamics of social harmony, by intractable conflict, interethnic tension, or relative.
